WHAT ARE THE GOALS OF FLEG II?

- Continue implementation of the 2008 St. Petersburg FLEG Ministerial Declaration, an expression of commitment by 44 governments from the Europe and North Asia region and other participating countries to take action against illegal logging and associated forest crimes, as well as scaling up of success from the first FLEG Program (2008-2012).
- Formulate and implement sustainable forest policies, including legal and administrative reforms for sustainable forest management and protection as well as increased capacity.
- Demonstrate the best sustainable forest management practices in targeted areas that can be further replicated.

WHAT ARE SOME OF THE ACHIEVEMENTS OF FLEG II?

- Regionally, the Program has supported dialogue and action through its steering committee meetings and roundtables that involve government officials, forest experts and NGOs from each country.
- An ongoing benefit of the FLEG program has been the establishment of forest professional networks within the region, which were lost during the dissolution of the Soviet Union.
- Activities in one country such as training youth or developing log tracking systems can be of direct benefit to other participating countries through the exchange of best practices and experiences.
